

# FERTILIZER RECOMMENDED SYSTEM FOR DISEASE PREDICTION

DOMAIN = [ AIRTFICAL INTELLIGENCE ]

## OBJECTIVES

- The application illustrated in this work can be effectively used to reduce the problem of crop that is affected by disease
- The proposed method **uses SVM to classify tree leaves, identify the disease and suggest the fertilizer.**
- The proposed method is compared with the existing CNN based leaf disease prediction.
- The proposed SVM technique gives a better result when compared to existing CNN.
